Document Information

Performance Report · ZPG-RPT-2026-014 · version 1.0

Title	Agency Performance Report — Third Quarter 2026
Document type	Performance Report
Entity	Zentra Property Group
Prepared by	Ali (Hermes Agent) for ZMJ Solutions
Prepared for	Zahiruddin bin Mat Jailaini
Scope	Demonstrates the shape of a Zentra-branded report and PDF: cover, document information, automatic contents with page numbers, running heads, data tables, charts, decision boxes, footnotes and a sign-off page. Every figure in this document is demonstration data.
Reference system	Zentra Report Kit · assets/zentra-report.css · DESIGN.md (v-alpha)
Date / version	19 September 2026 · version 1.0
Status	Draft for review
Classification	Confidential
Review cycle	Reviewed quarterly or whenever the underlying data source changes

This document is produced from a single HTML content file plus one print stylesheet. Chapter numbering, contents entries and page references are generated automatically — the author never types a page number.

Version control. This document is release 1.0 dated 19 September 2026. Increment the version number for every content change; earlier versions are retained for reference and never deleted.

Executive Summary

Quarterly performance at a glance, the main findings, and the decisions required from the reader.

The third quarter of 2026 recorded the strongest transaction performance of the year, with a materially shorter closing cycle than the previous quarter.

Closed value rose to RM 4.82 million across 27 units, against RM 4.09 million and 24 units in the second quarter. The conversion rate improved from 9.6% to 11.4% after the qualification filter was tightened in July 2026, while the median closing period fell from 51 days to 42 days. This chapter summarises three things: headline numbers, two observations that need attention, and the decisions recommended at the end of the document.

Key Findings

- Higher-quality enquiries.** The conversion rate improved from 9.6% to 11.4% after the qualification filter was tightened in July 2026.¹
- Shorter closing cycle.** The median fell to 42 days from 51 days; the largest single factor was earlier collection of financing documents.
- One unresolved risk.** Dependence on two financiers covers 61% of cases; this exposure is discussed in Chapter 5.

DECISION REQUIRED

Approve the Chapter 6 recommendations: (a) enforce the four-viewings-per-week cap per negotiator, and (b) open two additional panel financiers before year-end. Both are low-cost and act on the two findings above.

HOW TO READ THE FIGURES

Every number in this document is demonstration data. Replace the content file and metadata, and the same layout, numbering and references are produced for a live report.

¹ Qualification filter: financing eligibility is pre-checked before viewing appointments are scheduled.

Sales Performance

Monthly closed value and units, with the source of each figure stated.

Closed value rose steadily from July to September. September alone contributed RM 1.94 million, the highest monthly figure of the year.

TABLE 2.1 — CLOSED VALUE AND UNITS BY MONTH

MONTH	UNITS	CLOSED VALUE (RM)	MEDIAN DAYS
July 2026	8	1,382,000	46
August 2026	9	1,498,000	43
September 2026	10	1,940,000	39
Quarter total	27	4,820,000	42

Observation

The September uplift comes from three bulk enquiries handled by a single negotiator, so the monthly pattern should not be read as a trend until the fourth quarter closes.

Portfolio Mix

Distribution of property types across closed transactions and their contribution to value.

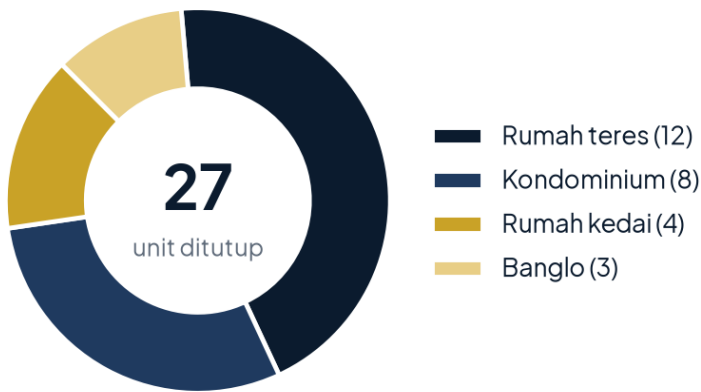

TABLE 3.1 — CONTRIBUTION BY SEGMENT

SEGMENT	UNITS	VALUE (RM)
Terraced houses	12	1,986,000
Condominiums	8	1,544,000
Shop houses	4	864,500
Bungalows	3	425,000

FIGURE 3.1 — Property type mix, third quarter 2026 (demonstration data).
Terraced houses remain the largest segment by unit count, while shop houses generate the highest value per unit. Condominiums attract the fastest enquiries but the slowest financing approvals.

METHOD NOTE

Segments are assigned on the date the sale and purchase agreement is signed. Transactions that change segment mid-process are counted once, under the segment recorded at signing.

Process and Workflow

The workflow actually followed, and the quality checkpoints that keep figures reconcilable.

- 1 **Enquiry intake.** Every enquiry is registered with its source channel and a response-time stamp.
- 2 **Qualification.** Financing eligibility is pre-checked before any viewing is scheduled.
- 3 **Viewing and offer.** Offers are logged with the date, unit and agreed price.
- 4 **Documentation.** Financing documents are collected within seven days of the offer.
- 5 **Closing.** The signed agreement is reconciled against the register before the month is closed.

Quality Checkpoints

- ☐ Every closed figure traces back to a signed agreement reference.
- ☐ Month-end reconciliation is signed by two people.
- ☐ Response-time stamps are checked weekly, not monthly.
- ☐ Financing approvals are tracked per financier, not in aggregate.

Observations and Risks

What the figures do not show, and the exposure that needs a decision.

CONCENTRATION RISK — HIGH

Two financiers account for 61% of all closed cases. A single policy change at either institution would affect most of the pipeline. Recommended action: open two additional panel financiers before year-end.

DATA QUALITY — MEDIUM

Nine enquiries in the quarter were registered without a source channel, which weakens any channel-level comparison. This is a process gap, not a system gap.

Confirmed Causes

1. The response-time stamp is optional in the current intake form — hence the missing channels.
2. Financing documents are collected by three different people with no shared checklist.
3. Panel financiers were last reviewed in 2022.

Numbers are only comparable when the process behind them is identical every month.
Our advantage this quarter was discipline, not demand.

Internal review note, September 2026 (demonstration data)

Recommendations and Actions

Three recommendations, each with an owner and a date.

TABLE 6.1 — ACTION PLAN

ACTION	OWNER	DUE	COST
Make the enquiry source channel a required field	Operations	15 Oct 2026	RM 0
Introduce a single shared financing checklist	Operations	31 Oct 2026	RM 0
Open two additional panel financiers	Management	15 Dec 2026	RM 0

Review Before Approval

- ☐ Owner named for every action.
- ☐ Due date inside the current planning cycle.
- ☐ No action depends on an unbudgeted cost.

DECISION REQUESTED

Approve all three actions. No additional budget is required, and each action addresses a finding recorded in this report.

Appendix A — Method and Definitions

TABLE A.1 — DEFINITIONS OF TERMS

TERM	OPERATIONAL DEFINITION
Closed value	Total agreed price of agreements signed within the period.
Conversion rate	Closed units divided by qualified enquiries in the same period.
Closing period	Calendar days from accepted offer to signed agreement.
Qualified enquiry	An enquiry with confirmed financing eligibility.

Appendix B — References

- Agency transaction register, third quarter 2026 (demonstration dataset).
- Month-end reconciliation records, July to September 2026.
- Zentra Report Kit — print stylesheet and build script, version 1.0.

RECOMMENDATIONS AND ACTIONS

Figures are rounded to the nearest RM 500. Percentages are computed on unrounded values.

Verification & Disclaimer

All figures are demonstration data created to validate the report template. They must not be quoted as business results. Published figures are drawn from the agency transaction register, reconciled monthly against the signed sale and purchase agreements.
